EXECUTIVE SUMMARY

EXECUTIVE SUMMERY

The training in the Wai Urban Co-Op Bank involved the understanding of working of loan department by interacting with the senior and junior staff of the bank. This project helped me to get the deeper understanding of the concept of all types of loans and how decision is taken while granting of loan.

Basically, the study is based on the analysis of all retail loans offered by Wai Urban Co-op Bank, loans such as Education loan, Vehicle loan, Gold loan, etc. Loan procedure was studied to begin with the society, one has to apply for it with relevant documents such as application form with photograph, income details, with income proof or income tax return, last six month bank statement etc. The bank verifies the application and determines the credit worthiness of the application depending upon the category of borrower. If it is feasible the loan is sanctioned.

The next part of study was understanding the criteria for granting and verifying the loan application in light with the criteria decided. For that purpose, different loan files were checked also the documents provided by the customer were checked. To analysis the credit worthiness of the customer and arriving at the decision about whether to grant the loan or otherwise.

The project concludes that the loan procedure of The Wai Urban Co-Op Bank is systematic and leaves no scope for any kind of manipulation. All the necessary measure applied by the bank they are trying to give all possible services to the customer.

CHAPTER I

INTRODUCTION

INTRODUCTION

To begin with, as a part of the curriculum a summer internship program was to be conducted for 2 months. Given a choice one was allowed to choose the field in which one was interested. As my interest and curiosity was in finance. I choose to work with The Wai Urban Co-Op Bank as a Finance Intern. The Wai Urban Co-Op Bank has an experience of about 100 plus years in the market. It is one of regional rural bank which offers loans such as personal, vehicle, agriculture, gold, housing loans and fixed deposits. I choose this reputed bank because with such a great firm I can explore myself and expected to grow more.

Due to summer internship, I learned various types of loans, KYC process, loan recovery process, documentation, CIBIL Score.

The purpose of this project is to explore the role of co-operative bank loan schemes and their impact on providing financial support to individuals and communities. Co-operative banks, often rooted in local communities and driven by the principle of mutual benefit, offer a range of loan schemes—such as home loans, education loans, and gold loans—that cater to diverse financial needs. Unlike commercial banks, cooperative banks prioritize affordability and accessibility, often extending loans at competitive interest rates and with flexible eligibility requirements.

This project will analyse the unique features, advantages, and potential drawbacks of co-op bank loans, examining how they serve as a bridge to financial inclusion, especially for those who may lack access to traditional banking services. By understanding these schemes, we can better appreciate the importance of co-operative banks in fostering local economic growth and empowering community members to achieve financial stability and independence.

FUNCTIONS OF BANKS:

1. Primary Functions:

- 1.1. Accepting deposits.
- 1.2. Providing loans and advances.

2. Secondary Functions:

- 2.1. Transfer of monetary funds
- 2.2. Collection of cheque

2.3. Agency services

2.4. Portfolio management

2.5. Issue of draft, Letter of credit etc.

2.6. Locker facility on rental basis

Advantages

1. Lower Interest Rates: Co-op banks generally offer lower interest rates than commercial banks, which can make borrowing more affordable.
2. Personalized Service: They often have a smaller customer base, allowing for a more personalized approach to customers' needs, which can be helpful during loan approval and repayment.
3. Flexible Loan Criteria: Co-op banks may be more flexible in assessing loan eligibility, making it easier for small business owners or individuals with limited credit history to qualify.
4. Community-Oriented: Co-op banks are often focused on serving specific communities or groups, which can foster trust and support local growth.
5. Dividends and Lower Fees: As members of the bank, borrowers may receive dividends or profit shares, and co-op banks often have lower fees for services.

Disadvantages

1. Limited Range of Services: Co-op banks may not have as many products, loan types, or advanced online services as larger commercial banks.
2. Lower Capital Availability: Because they are smaller, co-op banks may have limited capital, which can restrict the amount or size of loans they can offer.
3. Geographical Limitations: They often serve specific regions or communities, which can limit access if you move outside their service area.
4. Lengthy Approval Processes: Some co-op banks may have longer approval processes due to less automation and more manual decision-making.
5. Risk of Mismanagement: Co-op banks are sometimes subject to governance issues, which can lead to financial instability if not managed well.

OBJECTIVES

The following are the objectives of the study:

1. To study the concept of Retail Loan.
2. To know the lending practices of banks in India.
3. To know different type of loans preferred by different sets of customers.
4. To know the satisfaction level of the customers from Bank's lending policies.
5. To examine types of Retail loan.
6. To study the customers satisfaction levels towards banks in Wai city.

SCOPE

1. It aims at getting an insight into Retail loan.
2. Deep knowledge about Retail loan.
3. Day to day loan scheme and loan value will increase.
4. Most of the people 1st preference to loan

LIMITATIONS

1. This project report was time bound and due to this only such aspects of the subject were taken up for study.
2. The study is based on the data of past three years only.
3. This project was done in a limited area only i.e. Wai, Satara only. Findings may vary if the area of study is changed.
4. This project report was limited only to The Wai Urban Co-Op Bank.
5. The busy schedule of the bank employee who were to be contacted for discussion was major limitation of the project work.
6. As majority of the customers are employees of the bank, they might be biased in giving the information.

CHAPTER III

LITERATURE REVIEW

Retail loans are loans issued to individual customers rather than businesses, often including products like personal loans, home loans, auto loans, and credit card debt. Retail lending has become a crucial segment in banking due to its volume and revenue generation. Studies on retail loans highlight the growth in demand for these loans due to increased urbanization, improved income levels, and evolving financial literacy among consumers.

1. Introduction to Retail Loans

- 1.1. **Bhole & Mahakud (2009):-** Emphasizes how financial liberalization has made retail lending more competitive, pushing banks to innovate and expand their portfolios.

2. Types of Retail Loans and Their Characteristics

- 2.1. **Rajan & Zingales (1998):-** Personal and consumption loans have surged in recent years, with significant differences in demand patterns depending on demographic factors.

3. Customer Preferences and Factors Influencing Loan Choice

- 3.1. **Thakor (1996):-** Explores how personal income levels, employment stability, and digital accessibility are key determinants in retail loan choices.
- 3.2. **Agarwal et al. (2014):-** Highlight the role of mobile banking and online loan applications in increasing loan uptake, especially among younger demographics.

4. Economic Impact and Retail Loan Growth

- 4.1. **Mishkin (2001):-** Discusses the double-edged effect of retail lending on economic growth and inflation.
- 4.2. **Subbarao (2011):-** Explores the role of retail loans in stimulating demand and consumption but cautions about the risks of a high debt-to-income ratio among households.

CHAPTER IV

RESEARCH DESIGN AND

METHODOLOGY

Introduction:

Research in simple term refers to search for knowledge. It is a scientific and systematic search for information on a particular topic or issue. It is also known as the art of scientific investigation. Several social scientists have defined research in different ways. Definition of research methodology is a tool to systematically solve the research problem. It may be understood as a science of studying how research is done scientifically.

Definition of Research Methodology:

Research methodology is the way in which research problems are solved systematically it is a science of studying how research is conducted scientifically. Under it, the researcher acquaints himself with the varies step generally adopted to study a research problem along with the underlying logic behind them. Hence it is not important for the researcher to know the research techniques/method, but also the scientific approach called methodology.

Research Design:

The convenient sampling method has been used for identifying the issues of the various working department. Retail Banking is vast working area, so specific Retail Loans were selected to study the actual process. Research Design is the based framework which provides guidelines for the research process. It is a map or blue print according to which the research is to be conducted. The research design specifies the method for data collection and data analysis which determine the source of data.

Objectives:

1. To study about the comparative advantages of various retail loans offered by The Wai Urban CoOp Bank.
2. To make a comparative study of with respect to other public sector banks.

3. To study customers perception of The Wai Urban Co-Op Bank, and about the retail loans offered by The Wai Urban Co-Op Bank.

Population Define:

A complete set of elements (person or objects) that possess some common characteristic defined by the sampling criteria established by the researcher. In this case all customers of the bank are population.

Composed of two groups:

1. Target Population
2. Accessible Population

Sampling Unit:

The Study population includes the customers of bank and Sampling Unit for Study was Individual Customer.

Sampling Size: 140 Respondents

Data Collection:

There are two methods of data collection.

1. Primary Data
2. Secondary Data

A. Primary Data:

1. Conversation was made with the customers for collecting data and to know the problems they are facing in the process of Retail Loan.
2. Primary data is on Observation Method and questionnaire.

B. Secondary Data:

1. Annual Reports of the bank.
2. Financial statement.
3. Manual of instructions on loans and advances.
4. Identifying the process of retail loan.
5. Leaflet of bank.

Tools of the Study:

Interviews were conducted to collect data from officers dealing with the responsibility of officer's collection in retail department. Survey and observative interviews were conducted to data from customers. A questionnaire was framed to extract the all information about retail loans offered by the bank.

Statistical Tools: Following MS Office Tools are being availed while preparing the project.

1. **MS Excel:** Pictorial and graphical representation of data.
2. **MS Word:** Preparation of project and other reports.

Methods for presentation of data:

Traditional method of data representation i.e., Pie chart tables.

CHAPTER V

CONCEPTUAL BACKGROUND

CONCEPTUAL BACKGROUND

Retail Loan is a typical mass-market banking, where individual customers use local branches of larger co-op banks. Services offered include: savings and checking accounts, mortgages, personal loans, debit cards, credit cards, and so. The Retail Loan environment today is changing fast. The changing customer demographics demands to create a differentiated application based on scalable technology improved service and banking convenience. Higher penetration of technology and increase in global literacy levels has set up the expectations of the customer higher than never. Increasing use of modern technology has further enhanced reach and accessibility.

The present project attempts to create awareness about different types of loan lending products; to identify the exact needs of the customers and finding a best suitable product; to guide and help the customer for approaching the bank; to get the maximum possible amount for customer; to increase the customer satisfaction level and to find the awareness of people about different loans and offers, the suggestions are based on findings. This study has been conducted purely to understand retail Loan. The study is restricted to one bank based on comparative analysis of different types of loans. Detailed study of the topic was not possible due to limited size of the project. There was a constraint regarding time allocation for the research study i.e., for a period of 60 days.

Suggestions and conclusions are based on the limited data. Without a sound and effective banking system in India it cannot have a healthy economy. The Banking system of India should not only be hassle free but it should be able to meet new challenges posed by the technology and any other external and internal factors. With years, banks are also adding services to their customers. The Indian banking industry is passing through a phase of customers market, the customers have more choice in choosing their banks. Competition has been established within the banks operating in India, by the stiff competition and advancement of technology, the services provided by banks have become easier and more convenient. The basic reason for which loans are given to the customers is to help them and satisfy their needs.

So different kinds of loans are given to the customers by various bankers in order to help the customer in satisfying their various needs. Loans and deposits constitute an important part of any banking or financing business, and the profit made by banks or nonbanking financing companies mainly depends upon the spread of loans and not interest income of that particular bank or company. In order to enhance its profit, will offer

different kinds of loans with attractive lending terms.

The study was conducted to know about the fundamentals of the retail loans and to know about the policies, procedures and practices to study about the portfolio management of various loans i.e., Housing Loan, Agricultural loan, Vehicle loan, Gold loan and loan against Property.

1. EDUCATION LOAN

Education loans are issued for the purpose of attending an accredited college or a university to pursue an academic degree. Education loans can be obtained from the government or through private-sector lending sources.

Four major types of Educational Loans:

- **Direct Subsidized Loans:** Loans made to eligible undergraduate students who demonstrate a clear financial need.
- **Direct Unsubsidized Loans:** Loans made to eligible undergraduate, graduate, and professional students (eligibility isn't based on financial need).
- **Direct PLUS Loans:** Loans made to graduate or professional students and parents of dependent undergraduate students to pay for education expenses not covered by other financial aid (eligibility isn't based on financial need, though a credit check is required). Borrowers with a poor credit history must meet additional requirements.
- **Direct Consolidation Loans:** Loans that allow you to combine your eligible federal student loans into a single loan with one loan servicer.

Purpose	For Studies in India and Abroad
Eligibility	Studies in India: Graduation courses/Colleges under Universities Other courses leading to diploma / degree etc. conducted by colleges / universities approved by UGC / Govt. / AICTE / AIBMS / ICMR etc. Studies Abroad: Job oriented Prof/Technical / PG courses/ Post Graduation:- MBA, MCA, MS, etc.
Student Type	Student should be Indian national, have secured admission by Entrance test / Merit bases selection
Maximum amount	In India: Rs.10 lakhs and Abroad: Rs.20 lakhs
Security	Up to Rs.4.00 lakh – Clean and Abroad
Guarantor	Above Rs.3.00 lakh to Rs.8.00 lakh Satisfactory third-party Guarantee Above Rs.8.00 lake. Value of collateral security after providing requisite margin as below should be equal to the quantum of finance plus 2 acceptable guarantors.
Margin	Rs.4.00 lakhs – Nil30% up to 5 lakh And 40% above 5 lakh
Deduction limit	N.A.
Repayment	EMI – 84 Months (Loan plus into. Accrued together)
Moratorium	Course Period + 1 year OR 6 months after getting job whichever is earlier
Rate of Interest	Student in India 10.50% Student in Abroad11.00%

List of documents required for Education Loan:

Purpose	Salaried	Others
Photo Proof	3 Photos	3 Photos

2. LOAN AGAINST PROPERTY

Loan Against Property scheme is a secured personal loan which you can avail by pledging your property as a security or a collateral. These personal loan schemes are also known as mortgage loans.

Factors affecting Loan Against Property interest rate

- **Loan Tenure** - The repayment tenure determines the interest rate charged by the bank. Shorter the repayment tenure, higher will be the rate of interest charged.
- **Credit Score** - You must have a credit score of 700 and above if you wish to avail a loan against property at lower rates of interest.
- **Type of property** - The market value and the type of property determines the interest rate charged by the lender.
- **Profile of the applicant** - The age, occupation, income, etc. also determines the interest rate charged by the bank.

Purpose	To meet personal Expenses
Eligibility	Permanent salaried / Professionals
Age	21 years – 50 years at Loan Maturity Minimum age must be 18 and the repayment of loan Up to its retirement i.e., 58-60
Minimum Annual Income	Minimum amount of income per month is 15,000 and 2 lakh after income tax
Loan Amount	25,000- 25,00,000
Margin	50%
Mortgage type	Immovable Property
Rate of Interest	12.00%
Security	Clean
Guarantor	Two Guarantor acceptable to Bank
Repayment	EMI – 60 Months (Max) or residual service whichever is less 60 Months
Processing Fee	0.50% of the loan or service tax amount 0.50% of loan amount
Insurance	N.A.
Group Finance	No Group Finance
Others	N.A.

List of Documents Required for loan against Property

Documents	Salaried Applicants	Other Applicants
Proof of Identity	Voter's ID card or driving license or PAN card or photo credit card or employee's ID card, or defense or police or government department ID card	Voter's ID card or driving license or PAN card or photo credit card

4. HOUSING LOAN SCHEME

Home Loan is a secured loan product where the lender provides finances for the purchase or construction of a residential/commercial property. One can also avail a housing loan to buy a plot of land and construct on it. Home Loans are also issued to extend/ repair/ renovate/ alter a new or second-hand property. The Home Loan is taken by a borrower against the property/security to be bought. This is done by giving the banker a conditional ownership over the property i.e. if the borrower fails to pay back the loan, the banker can retrieve the lent money by selling the property

Purpose	○ Build your own house ○ Purchase New house/ Flat (Old or New) ○ Repairs & renovations of existing house
Eligibility	Salaried Persons, Professionals, Businessmen with sufficient disposable income. Farmers having min five acres of irrigated land holding. Nonresidential Indians are also eligible.
Age	Minimum 21 years – Maximum 50 yrs. For salaried persons. Maximum 55 years for other than salaried persons.
Quantum of Loan	For Salaried class 50 times of Gross Salary or 60 times of Net Monthly salary whichever is higher subject to applicable margin For Businessmen Equal to average annual income (Net profit + Depreciation) of last 3 years X 4 times (B/S, IT returns) Also note repayment of any other term liabilities. For Farmers 4 times of average annual net income. Cross check Gross income, land holding, cropping pattern, Sugar Factory/APMC/other agencies bills etc. Ensure for repayment capacity & repayment experience.

Housing Loan Tips

Before you get into a home loan agreement, be sure to keep a checklist of things to clear out while signing on the necessary documents. Below are some of the things you can keep in mind to make sure you don't receive a sour deal.

Home loans are available from mainly two types of lenders—commercial banks and housing finance companies. Different lenders may quote you different rates of interest and other terms and conditions, so you should contact several lenders to make sure you're getting the best value for money.

Find out how much of a down payment you are required to pay, and find out all the costs involved in the loan (including processing fees, administrative charges and prepayment charges levied by banks). Knowing just the amount of the EMI or the interest rate is not good enough.

5. AGRICULTURE LOAN

Agricultural loan is offered by banks, micro finance institutions and also government agencies to help develop India's agricultural sector. These loans can be availed to finance agricultural projects such as purchasing land, upgrading or buying farm machinery, constructing irrigation channels, building grain storage sheds and more.

CHAPTER VII

FINDINGS AND SUGGETIONS

FINDINGS

- Most of the customer prefer Cooperative bank for the borrowing money for purchasing of their services and goods.
- 54% of customers have taken housing loan from the bank. 17.1% and 17.1% of customers have taken both vehicle loan and education loan respectively. Very few customers avail the facility of gold loan which is one of the most easily available loan form bank.
- From the customer feedback it is found that 69% customers are satisfied with services of the bank and only 9% of customers are not satisfied with services of bank.
- Most of the customers of bank are aware of many services provided by the bank like loans and internet banking facility and also UPI facility. But there are very few customers who are aware about agency services provided by the bank. This service is provided at very low rate of commission by the bank, bank needs to promote this service to increase in their nonoperating profits.
- Now 77% of customer suggest co-operative bank is excellent for all types loans, and would like to recommend this bank with their friends and families.
- It is observed that 54% of the loans are above ₹300,000. And 40% of loans are in between ₹50,000 to ₹300,000.

SUGGETIONS

- Bank Should decrease their loan interest rates to attract more customers, as interest rates are a major factor influencing customers' decisions when choosing a bank for loans.
- Bank should try to give speedy as well as quality services to the customers, and increase the speed of loan approving process.
- Bank should promote their various available loan schemes with their rate of interest through advertisement to attract more customers.
- Bank should seek for customer delight instead of only satisfaction of customers.
- The banks should plan to introduce new schemes for attracting new customers and satisfying present ones.

The bank should improve the customer services of the bank to a better extent

CHAPTER VIII

CONCLUSION

CONCLUSION

There is need for constant innovation in retail Loans. This requires new schemes to attract the customers, especially for middle class people. Product development and differentiation marketing, product pricing, customization, technological up gradation, home/electronic/mobile banking, effective risk management and asset liability management techniques. While Retail Loan Offers phenomenal opportunities for growth, the challenges are equally discouraging. How far the retail Loan can lead growth of banking industry in future would depend upon the capacity building of banks to meet the challenges and make use of opportunities profitably. However, the kind of technology used and the efficiency of operations would provide the much-needed competitive edge for success in retail Loan business. Furthermore, in all these customer interests is most important.

LEARNING FROM PROJECT

- In the first week of my internship program, I have got the basic idea about The Wai Urban Co-op Bank.
- In the study period I learned about the different type of loans offered to customers such vehicle loan, housing loan, education loan, gold loan etc.
- I have learned about the overall loan application procedure of The Wai Urban Co-op Bank.
- In the study period I also gone through the actual loan application case where I understood the different types of documents required for sanctioning the loan for different types of loan schemes.
- I have also learned about the saving accounts, current accounts, NEFT, RTGS and IMPS.
- I also learned about various problems of the customers, which are faced by them at bank.
